AQUILA ADVENTURE STENAR 4X4

PRECISION BUILT IN SLOVENIA.
ENGINEERED FOR THE UNKNOWN.

INNOVATION MEETS THE UNBEATEN PATH

AQUILA Adventure represents the pinnacle of quality and innovation in the expedition vehicle industry. Our philosophy is simple: to engineer ultralight, carbon-fiber-reinforced vehicles that bridge the gap between sporty, rugged exteriors and aesthetically refined, luxury interiors.

ULTRALIGHT ENGINEERING. MAXIMUM PAYLOAD

Utilizing cutting-edge technology and advanced manufacturing, we achieve an **exceptionally low travel-ready weight**. This allows for a remarkably high payload capacity without exceeding the 3,500 kg (B-category) limit.

THE POWER OF AUTONOMY

Engineered for athletes and explorers, an AQUILA van is a **fully autonomous sanctuary**. Masterfully blending rugged 4x4 performance with total self-sufficiency, we ensure you can explore the most remote destinations without ever sacrificing the comforts of premium living.

UNCOMPROMISING CAPABILITY

This is far more than a motorhome—it is a **purpose-built exploration machine**. From reinforced suspension to robust underbody protection, every detail is crafted to conquer demanding terrain.

WHY CHOOSE AQUILA?

- **Carbon-Fiber Construction:** Ultralight cabinetry for superior durability and weight savings.
- **Total Self-Sufficiency:** Powerful lithium systems and high-output solar for true off-grid freedom.
- **Four-Season Comfort:** Premium insulation and 4kW heating designed for environments from the Sahara to the Arctic.
- **Bespoke Interiors:** A functional, "home-away-from-home" experience tailored to your active lifestyle.

THE LIVING SPACE: VERSATILITY MEETS COMFORT

Experience a "home-away-from-home" designed for rest and refinement. Our interiors are built around your lifestyle, offering:

Flexible Layouts: Choose between Longitudinal or Transverse bed configurations.

Signature Sleeping: Our Queen-sized folding bed system provides a massive, high-end retreat by night and a spacious central walkway by day.

Smart Cargo System: The rear floor is equipped with integrated Airline tracks, providing professional-grade lashing points to securely transport motorbikes or e-bikes inside the van, protected from the elements and theft.

Integrated Dining: Swivel cabin seats create a seamless, open-concept dining area for a comfortable social experience.

THE CULINARY & WET ROOM SUITES

Gourmet Kitchen: Choose between a traditional gas or a high-efficiency induction cooktop. Includes a 95L compressor fridge (with an optional 51L auxiliary fridge for extended trips).

The Wet Bath: Accessible via a space-saving louvered sliding door, featuring a folding sink and the revolutionary Clesana waterless toilet—completely chemical- & odor-free, and eco-friendly.

THE LIVING SPACE: VERSATILITY MEETS COMFORT

Stay off-grid longer with the most advanced electrical system in its class:

Energy Storage: A massive 540Ah Lithium battery, hidden discreetly under the passenger seat to preserve every inch of living space.

Victron Intelligence: A 3000W inverter paired with 50A triple-charging (DC-DC, AC, and up to 650W Solar) ensures you have 230V power wherever you wander.

Four-Season Climate: Controlled by a 4kW Truma Diesel & Electric heater for year-round comfort.

AQUILA CUSTOM ALUMINUM ACCESSORIES

Our in-house, **powder-coated aluminum gear** is designed for maximum utility with minimum weight:

Roof Ecosystems: Heavy-duty roof racks, Lazer LED Light Bars & Work Lights, integrated aluminum storage boxes, and specialized ski boxes.

Rear Utility: Spare wheel carriers with integrated ladders for easy roof access.

ULTIMATE OFF-ROAD PROTECTION & PERFORMANCE

Prepare your rig for the world's most demanding terrain with our "Heavy Duty" exterior accessories:

Armor & Protection: Complete bash-plate package and reinforced suspension mounts, heavy-duty bullbar, and rock sliders.

Traction & Breathing: Rear Air Diff-Lock, high-performance All-Terrain tires, and a dedicated snorkel for dust and water crossings.

CHOOSE YOUR LAYOUT: TAILORED TO YOUR JOURNEY

At **AQUILA Adventure**, we understand that every explorer has different priorities. Whether you prioritize a king-sized sleeping experience or need the versatility of four travel seats, we offer two distinct floorplans engineered to the highest standards.

THE LONGITUDINAL LAYOUT

The Ultimate Sanctuary for Couples Designed for those who refuse to compromise on sleep quality, the longitudinal (lengthwise) layout transforms your van into a premium bedroom suite.

Expansive Sleeping Area: Featuring a massive 170 x 200 cm bed, providing residential-level comfort and the ability to sleep lengthwise without compromise.

Sleek Exterior: This layout maintains the original vehicle lines with no side extensions required, preserving the van's aerodynamic profile.

Spacious Interior Flow: Optimized for two travelers, this layout offers a more open living area and an oversized garage space underneath for high-end gear.

THE TRANSVERSE LAYOUT

Maximum Versatility & Family-Ready The transverse (crosswise) layout is a masterpiece of space management, designed for those who want a high-performance 4x4 that can carry the whole crew.

Seating for Four: Equipped with four certified travel seats, making it the perfect choice for families or those who enjoy traveling with friends.

Carbon Fiber Side Extensions: To achieve a spacious 160 x 200 cm bed while sleeping crosswise, we integrate our proprietary Carbon Fiber "flares." These ultralight extensions increase the interior width while maintaining our strict weight-saving standards.

Compact Efficiency: By placing the bed across the vehicle, we reclaim valuable floor space for the additional passenger seating and an expanded dining area.
